

Mohamed Hashim H

B.Tech (AI&DS)

Aspiring **Data Analyst** with a growing skill set in Excel, SQL, Python (Pandas), and Power BI, driven by curiosity and a strong desire to learn. I have gained practical experience through academic and independent projects, where I worked on data cleaning, created visualizations, and uncovered valuable insights. I enjoy solving problems and transforming data into meaningful stories that support better decision-making. Eager to continue learning and contribute to real-world analytics work with accuracy and enthusiasm.

PERSONAL PROJECTS

Web Page Analysis 2025

Built an end-to-end data pipeline that scrapes web data using Python, processes and cleans it in Excel, and creates interactive visualizations in Power BI to derive actionable business insights.

Tools : Python, Excel, PowerBI

Achievements/Tasks

- Built a fully automated end-to-end data pipeline using Python, Excel, and Power BI to scrape, clean, analyze, and visualize web data
- Collected and processed 500+ data points, ensuring high data quality through structured validation and cleaning workflows
- Developed three interactive Power BI dashboards delivering actionable insights through KPI tracking, drill-downs, and trend analysis
- Improved operational efficiency by automating data ingestion and transformation, enabling real-time analytics and reducing manual effort to zero

HR Analytics Dashboard 2025

Built a complete HR Analytics Dashboard with 60-employee synthetic dataset featuring realistic data including departments, roles, salaries, performance scores, and attendance metrics for actionable workforce insights.

Achievements/Tasks

- Built an HR analytics dashboard with 4 KPI cards and multi-metric insights on performance, attendance, and salary
- Developed interactive charts including bar, scatter, pie, and area visualizations for department and employee analysis
- Processed 60+ employee records and created a ranked top-performers table with status indicators
- Delivered a structured, insight-driven dashboard workflow integrating KPI cards, charts, and data tables
- This project was handled using Python, PowerBI, Excel

INTERNSHIP

E- Soft IT Solutions

Web Development Intern 08/2024
Developed and enhanced interactive web pages using HTML, CSS, and JavaScript, optimizing user workflows and improving overall responsiveness and efficiency of the web interface.

ACHIEVEMENTS

Paper Presentation
Presented a technical paper on Autonomous Vehicles at a National-Level Technical Symposium hosted by M.A.M. Engineering College, showcasing strong research and presentation skills.

Paper Presentation
Presented a paper on LPDR Toll System at a National-Level Technical Symposium hosted by Dhanalakshmi Srinivasan Engineering College, demonstrating strong research and presentation skills.

NSS Club
M.I.E.T. Engineering College
Member of the NSS Club, actively participating in awareness rallies, medical camps, and a 7-day special camp, contributing to community welfare and outreach activities.

CERTIFICATES

SQL	(Dec 2024)
Python	(Jun 2025)
Forge TCS Data Analyst Job Sim	(Jul 2025)

SKILLS

SQL	PowerBI	HTML
Python	Excel	CSS
Data Analysis	Analytical Thinking	Communication
